LIBRARY  
THE UNIVERSITY OF TENNESSEE  
Report Covering the Period July 1, 1967-June 30, 1968

---

Within the State-wide library system, the University of Tennessee in fiscal 1968 celebrated the acquisition of its one-millionth volume, named and dedicated the Paul Meek Library at Martin, saw construction underway on the John C. Hodges Undergraduate Library in Knoxville, and, less uncommonly, made advances in use and service, support, acquisitions, minor expansion, and other areas of library operation.

The Millionth Volume

One standard by which the greatness of any university is measured is the size and quality of its library. The general public, surrounded by the publicity which attends many other functions of the university, is frequently unaware of the achievements of this less spectacular heart of the institution. Yet this is the foundation upon which scholarship, and eventually that elusive goal named 'learning,' is based. In the quiet stacks, in the separate cubicles, in the common reading rooms, live (in a most literal sense) the purposes--the triumphs or failures--of the true university.

It was a significant moment, then, when the library of the University of Tennessee recently acquired its millionth volume.<sup>1</sup>

The Board of Trustees at its meeting in Martin on February 2, 1968, framed a resolution commemorating the millionth volume added to the University library collections, an attainment which is, for many observers, coming to signify the validity of an institution's commitment to research and the extent of its support for advanced programs. The Papers of Andrew Johnson, Volume I, a UT Press publication edited by Dr. LeRoy P. Graf and Dr. Ralph W. Haskins, professors of history at the University, was selected to carry the inscription of millionth volume.

---

<sup>1</sup>Dykeman, Wilma. "Look to this day." The Knoxville News-Sentinel, February 18, 1968. [Used by permission of the author.]

The following day in Knoxville, at the annual meeting of the Century Club, Dr. Edward J. Boling, Vice President for Development, read the resolution and handed presentation copies to librarians representing UT's installations in Knoxville, Memphis, Martin, Nashville, and Tullahoma, and to Mrs. John C. Hodges.

John Cunyus Hodges, 1892-1967

Coordinator for Library Development, 1959-1967. Professor of English at the University of Tennessee for forty-one years. Chairman of the English Department for twenty-one years. Author, scholar, and the UT Library's greatest benefactor.

The relationship which began October 1959 between John C. Hodges and the UT Libraries was proposed by him, for surely no librarian anywhere would seriously entertain such an idea, much less suggest it, that a soon-to-retire professor might enjoy spending some time in the library, say six or seven hours a day, devising promotions for library support, including writing reports, letters, news releases, articles, and setting up the proper records and procedures for the receipt of gifts, these chores to be interspersed by trips across the State (at his own expense) in search of business men, banks, philanthropists, and owners of private libraries who might be persuaded to give their money or books to the University. In addition, he himself would donate thousands of dollars over the years in matching funds, endowments, memorial and special gifts.

John C. Hodges did all these things for the UT libraries, and more, in what he probably thought of as "spare time" between revisions of the Harbrace Handbook, trips abroad, preparation and publication of his book of Congreve's letters, participation in business, civic, church, social, and personal interests, including involvement as trustee or alumnus of other colleges and universities. It may have been spare time to him, but to the library staff in Knoxville it was an exciting and productive time, and he is now sadly missed. That his death on July 7, 1967, came only weeks before the actuality of the millionth volume, one of his goals, was less ironic than it would seem, for he had dismissed that goal as won and was planning campaigns for the second million.

The John C. Hodges Alumni Library Endowment, begun in 1964 by friends and colleagues to do him honor, was after his death subscribed to by alumni and friends as a memorial, its proceeds to be used for books in all fields. Funds for John C. Hodges Library Endowment were bequeathed by him for the purchase of books relating to English language and literature. John said many times that one mark of a great university is an excellent library, and it was his pleasure to help achieve that excellence for UT. It is altogether appropriate that the

library now being completed on the Knoxville campus should be named, as it was on October 27 by action of the Board of Trustees, the John C. Hodges Undergraduate Library.

### The John C. Hodges Undergraduate Library

Construction began in October 1967 on the undergraduate library, located on the property once occupied by the University Faculty Club at the corner of Volunteer Boulevard and Rose Avenue. The building will be in service in the spring of 1969, and will contain 100,000 square feet, seat 1,600 readers and house 180,000 volumes in the initial structure. Extended services will be offered undergraduates, including a large after-hours study area which can be kept open through the night if necessary, either during examination or regular schedule.

The undergraduate library, either a part of the general library or a separate structure, has become a fact of the educational life, mainly because the undergraduate was being slighted, though unintentionally, in favor of the scholar and research man. Graduate students and research workers have a right to find study and work facilities in the library of their chosen school as well as in the laboratory. On the other hand, the undergraduate must be equally served.

In the mid-fifties a nation-wide trend of increased library use was attributed to growing emphasis by faculty on the library as a teaching instrument, to higher standards for matriculation and, particularly, to lack of study space on campuses. Whatever the reasons, the result was critical competition between the undergraduate and the graduate for library seats and library services. Our graduate school was, and is, one of the fastest growing in the South, and our undergraduate enrollment was increasing almost unbelievably.

Campus planners were alerted to the need for an undergraduate library in 1950. Plans for an addition to Main were programmed in 1955, and an undergraduate area was included. In 1959 the Undergraduate Library was in use, housing 8,000 books and seating 250 students. Projected adequacy was for at least eight years, with expected acquisition of approximately 50,000 books. When the eight years had passed, almost 60,000 books were contained in that room and extra reader stations had been crowded into it.

The present undergraduate unit has more than fulfilled the purposes it was planned for. There was an immediate increase in library use, but, unexpectedly, there was no decrease in recorded circulation at the general collection loan desk or in any of the branch libraries. The undergraduate now

has access to an open-shelf collection selected strictly to reach his needs and inclinations. He is able to study in a comfortable and attractive book-oriented atmosphere, which is what the University Administration desires for its undergraduate students. Service to him has widened significantly and is administered by staff who are concerned solely with his needs. The general collection, of course, is available to him at any time. The separately housed undergraduate library will bring even more effectiveness to the educational processes for the undergraduate on this campus.

### The Paul Meek Library

The new library on the UT campus at Martin was dedicated on Monday, May 6, 1968, and named to honor Paul Meek, head of the Martin Branch from 1934 to 1967, an educator and administrator who has always shown an awareness of the library's role in academic excellence. The building employs many new developments in library planning. It is attractive and comfortable, with air conditioning, thermal glass, sound-proof study rooms, and color used with imagination and taste. Reader stations, both lounge study centers and individual study tables, are interspersed among the book stacks.

Miss Mary Ellis Hall, Librarian, reports that the availability of listening and viewing rooms is stimulating accelerated additions of discs, tapes, and forms of microfiche for use on circulating and non-circulating audio-visual equipment; the recent decision to offer the master's degree in education has prompted support for library materials in that field. Miss Hall has asked that her gratitude to the Knoxville library staff members who assisted with the planning and programming of the building be officially acknowledged.

### Library Operation

In the routine procedures of librarianship, progress was evident in all areas. State wide, the circulation of books increased 7.7 per cent; total library support rose 17 per cent; reference service, interlibrary loans, and addition of materials advanced 25 per cent respectively over fiscal 1967.

### Use and Service

Recorded Circulation of Materials: In Knoxville 522,685 books were circulated, a total campus increase of 5 per cent. Unusual activity was recorded in the Engineering Library, with a rise of 37 per cent; Biology 18 per cent; Education 14 per cent; Science 9 per cent; and the Main Library Loan Desk 5 per cent.

The Space Institute at Tullahoma recorded an increase of 119 per cent; Martin 21 per cent; Memphis 10 per cent; and the Nashville Center 13 per cent.

Recorded Reference Service: The librarians across the State answered 6,732 more reference questions than in 1967, with Knoxville showing a rise of 33 per cent and Memphis 30 per cent. It must be noted that since some of the libraries do not record reference answers, the chart on page 6 reflects only partial reference activity.

Answers by the Main Library Reference Department increased 46 per cent and substantial increases were reported in the branch libraries, which could

indicate more accurate tabulation, increased enrollment, growth of personal assistance to library users, or it could reflect another facet of the new breed of student, since not too long ago students hesitated to "bother" the library staff with questions. In attempts to overcome this reticence, we locate Reference personnel in readily approachable areas away from enclosures or counters which might form barriers to service, and endeavor to recruit as staff persons who really like to help people. We have been fortunate in having as the head of our Reference Department one of the best reference librarians in the profession, Miss Eleanor Goehring, who over the years has given her staff, outside of working hours, informal and intensive instruction in reference philosophy as well as use of reference tools, meanwhile showing them, in the day-to-day performance of duties, a pattern of excellence in librarianship.

Interlibrary Cooperation: In fiscal 1968, the University libraries lent 14,611 volumes to other libraries as against 11,709 last year, and borrowed 115 fewer from other sources, reflecting the institution's climb toward true research status and progress in improvement of collections to support its programs. Loans of books to other libraries is one of UT's activities in advancement of state, regional, and national educational growth by the sharing of resources and knowledge.

In October of 1967 a refinement of interlibrary cooperation was introduced to area colleges and universities by way of direct loans to meet individual needs of their faculty, when more feasible than regular interlibrary loans, to the extent it could be accomplished without damage to the library situation of UT's students and faculty. This offer has been extensively accepted by the schools in Knoxville and East Tennessee.

Automation: The library has not yet put into operation any program involving automated systems, although during the past years various members of the staff have attended automation conferences and institutes, visited libraries using these techniques, and followed the literature in the field. Specific applications of computer techniques were discussed with systems analysts and coordinated with appropriate campus personnel, with the intention of automating certain library operations as soon as procedures were fully refined.

The automation unit, set up and staffed in fiscal 1968, began preparing the undergraduate collection for automated operations in the new building. Research to determine the most effective equipment continued. Reports made by the automationist were reviewed by the library administration and the Automation Committee at regular intervals.

### The Problem of Space

One year ago the libraries on the Knoxville campus could accommodate 2,021 readers, or 11.21 per cent of the official enrollment; in 1968 only 10.6 per cent could be seated, despite an overall gain of seventy-one reader stations during the year. The percentage has been dropping for many years, but the Undergraduate Library's 1,600 seats will undoubtedly raise it somewhat, though not to the minimum American Library Association standard of 25 per cent.

Moving the undergraduate collection out of Main will, in addition, make available space for growth of the general collection perhaps until 1973. There is critical need for space in branch libraries, too, both for readers and books, especially in Engineering, Biology, and Science. Book and reader capacity will be substantially increased by the inclusion of a science-technology library in the building planned for science, engineering, and biology.

The Agriculture Library, moving from its life-time quarters in 218 Morgan Hall to the area released by Plant Sciences, gained 4,800 square feet of floor space and 51 reader stations. The move, planned and carried out by Robert E. Harrison, Assistant to the Director, was accomplished with dispatch during the December 1966 holidays. The new quarters are in good refinished condition, with central heating and air conditioning and a combination of natural

and artificial light which meets the illumination standards of the American Library Association.

The Main Library needs additional faculty studies, seminar rooms, and work space for technical services. An unavoidable encroachment upon reader/book space was made by moving Periodicals and Serials from the highly overcrowded Acquisitions Department into 528 square feet adjoining the stacks.

### Staff Activities

The Mary E. Baker Scholarship, a \$1,000 grant subscribed by the Knoxville library staff, was awarded to Barbara Minge, Reference assistant, who was accepted by the Graduate School of Library Science at the University of Illinois.

Donations of \$450, plus matching funds from John C. Hodges, increased the Library Staff Endowment Fund, a total staff participation in the Library Development Program, to \$3,437.09.

Library Lecture No. 20, "Twentieth Century Scholarship in the Research Library: A Marriage of Convenience," was delivered on May 7 by John H. Berthel, Librarian of Johns Hopkins University.

There were three promotions in rank from instructor to assistant professor: Mary Frances Crawford, Undergraduate Reference Librarian; Alice M. Nicholls, Education Librarian; Don W. Jett, Science Librarian. Aubrey H. Mitchell, Agriculture Librarian, was promoted to instructor from professional assistant; Helen Bean, Processing Department, and M. Sugg Carter, Circulation Department, were advanced to professional library assistants with academic rank.

Publications in professional journals were "Professional Staff Opportunities for Study and Research," by William H. Jesse and Ann E. Mitchell, Assistant Reference Librarian, in College and Research Libraries and "A Catalogue of Misfortunes," by Jesse C. Mills, Undergraduate Librarian, in Library Journal. Thomas T. Rogero, Engineering Librarian, continued as editor of Radiations for the Appalachian Chapter of the Special Libraries Association, and Lillian Kramer, Acquisition Department, edited the 7th Library Development Report (The University of Tennessee Record, Volume 70, Issue 5). Olive H. Branch, Jesse C. Mills, and John H. Dobson, Special Collections Librarian, each participated on Faculty Platform broadcasts, a program of the Division of University Extension which is carried on 55 radio stations throughout the State.

Staff travel was done for information and study, attendance at professional association meetings and academic functions of other universities, and assistance to other colleges and universities, either individually or as a part of a visitation team. Don Jett, Science Librarian, spent three months in Bangalore, Mysore State, India, as Library Development Consultant at the University of Agricultural Sciences there. Olive H. Branch, Acquisition Librarian, Jesse C. Mills, Undergraduate Librarian, and Gene M. Abel, Assistant Director, served on visitation committees for the Southern Association of Colleges and Schools. Robert Bassett, Assistant Acquisition Librarian, participated in a comprehensive study of Livingston State College (Alabama) being conducted by the University of Tennessee for the projection of plans for continuing development of the school. Jesse C. Mills, who helped to plan the award-winning University of Pennsylvania Library during his tenure there, advised High Point College in North Carolina on library building plans.

Various staff members held office in the following professional associations, took part in conferences, committee assignments, and workshops, and attended the regular meetings: American Library Association, Special Libraries Association, Tennessee Library Association, Southeastern Library Association, Association of Southeastern Research Libraries, Association of Research Libraries, Tennessee Education Association, and Tennessee's first Governor's Conference on Libraries. This latter was held in Nashville and was attended by approximately 1,200 business and civic leaders and librarians from throughout the State. Olive H. Branch, Acquisition Librarian, represented the UT Library.

### Resources

Gifts received through the Library Development Program were 4,674 books and \$90,800, making the 8-year total of the program's activities \$443,787 and 44,874 books. A detailed report of this year's accomplishment is to be found in Volume 71, Issue 6, of The University of Tennessee Record. Some gifts of such importance as to command note here are the John C. Hodges collection of the works of William Congreve, the Herbert E. Copeland estate library, the Stanley P. Johnson gift, the Charles P. White collection, the Horace Maynard papers, given by Mrs. Robert Lindsay for the Special Collections Library, and additions to the Smiley Blanton collection. A total of 15,285 manuscripts were added to Special Collections.

Expenditures for books, periodicals, and binding increased around \$120,000 over fiscal 1967; approximately 20,000 more books were added and more than 600 new periodical titles were received. The following list of notable acquisitions is a selective one, and necessarily so. It is hoped that one aspect of automated operations mentioned earlier will allow more frequent and more complete information to the faculty on current acquisitions.

## NOTABLE ACQUISITIONS 1967/68

Fine Arts (Art, Architecture, Music)Books

- Armellini, Mariano. Le chiese di Roma dal secolo IV al XIX... Roma, Edizioni R. O. R. E. di N. Ruffolo, 1942. 2 volumes.
- Catherwood, Frederick. Views of ancient monuments in Central America... [Barre, Mass., Barre Publishers, 1965]. [Reprint]
- Delteil, Loys. Manuel de l'amateur d'estampes des XIX<sup>e</sup> et XX<sup>e</sup> siècles (1801-1924)... Paris, Dorbon-aîné, [1925].
- . 700 Reproductions d'estampes des XIX - XX siècles... Paris, 1926. 2 parts.
- Händel, Georg Friedrich. The Works of... Edited by Friedrich Chrysander. Leipzig, printed for the German Handel Society, 1850- 90; [Farnborough, Eng., Gregg, 1965-66]. 97 volumes in 84.
- Langley, Batty. The city and country builder's and workman's treasury of designs... London, Printed for and sold by S. Harding, 1750.
- McKim, Mead and White. A monograph of the work of... 1879-1915... New York. The Architectural Book Publishing Co. [1914-15] 4 volumes.
- Pugin, Augustus Welby Northmore. Contrasts... London, The author 1836.
